SOFTWARE ENGINEER

I am a software engineer with a good understanding of both front-end and back-end development. I've worked with C++, JavaScript, HTML, and CSS, which helps me create websites and applications that are fast and easy to use. I enjoy learning new things and solving problems, and I'm always looking for chances to use my skills in real projects and keep improving as a developer.

TEHNICAL SKILLS

- **Languages:** C++, JavaScript, SQL, HTML, CSS
 - **Concepts:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP) •
Databases: SQL
 - **Tools & Technologies:** Git
-

PROJECTS

Smart Billing and Inventory Management System *Technologies:*

JavaScript, HTML, CSS, SQL.

- Built a web-based pharmacy system with Admin & User dashboards.
- Admin features: Add/update/delete products, manual invoice generation.
- User features: Browse products, place online orders.
- Implemented real-time billing logic, dynamic stock updates, and automated invoice generation.

Hotel Management System

Technologies: C++, OOP, Linked List, Queue, Stack

- Created a hotel management application supporting room allocation, booking requests, and administrative approval.
- Managed room data across multiple floors with tracking for availability and booking status.
- Included both regular and priority booking options for customers.
- Admin features allowed booking approval, cancellation, and room status monitoring.
- Enforced business rules such as a 30-night maximum stay policy.

Hospital Appointment Management System

Technologies: C++, Procedural Programming

- Developed a console-based application to manage appointment scheduling for multiple doctors.
- Implemented features including appointment booking, cancellation, and daily/monthly earnings tracking.
- Used multidimensional arrays to manage appointment slots and doctor-specific data. Employed modular programming practices with functions for maintainability and readability.
- Demonstrated proficiency in C++ I/O, control structures, and basic data structures.

Student Management System

Technologies: C++, Procedural Programming

- Built a console-based application using OOP to manage student data (name, age, grades).
 - Implemented class with friend functions for displaying details, updating grades, and calculating averages.
 - Applied core C++ concepts: classes, arrays, encapsulation, user input, and control flow.
-

EDUCATION

Bachelor of Science in Computer Science

University of Management and Technology, Lahore

LANGUAGES

- English, Urdu, Punjabi
-

HOBBIES

- Cricket, Badminton, Movies
